British Flooring Contract Services Ltd

British Floor Guardian

Floor Guardian is a lightweight, quick and easy to use floor covering designed to enhance a facility while providing protection for expensive sports halls and other floors when not being used for their primary purpose or extending the life of your existing floor.

British Floor Guardian is the only floor covering that is recommended and fully endorsed for use with Junckers Flooring this is an important point in maintaining the warranty on a new sports hall floor.

Sports halls or court hire fees generally do not cover operating costs. Over recent years the non sporting nature of many facilities has led to changes in the programming to include "special events" which cater for much higher number of visitors.

There are many different uses for Floor Guardian which enable facilities to capture new markets and increase income.

From a squash court to large indoor sports halls and every thing in between. Visit our websites for pictures of our latest installations.

Possible income generators, Children's parties, Weddings, dances, Birthday celebrations, seminars, exhibitions, meetings, cat dog and rabbit shows, indoor boot fayres, table top sales, temporary stage shows including wrestling, boxing tournaments.

Other uses, Emergency rest centres, School and further education examination venue, polling stations, and election counts.

A number of venues are requesting Floor Guardian under peace time civil contingencies to use as temporary flooring where they are designated as Peace Time Emergency Rest Centre's not only to protect their floors, but make them more welcoming and environmentally friendly.

NEW for 2008 – Floor Guardian is made here in the UK by a major manufacturer under licence from Floor Guardian USA which holds the patent for this product.

British Floor Guardian is only available through British Flooring Contract Services Ltd and is not manufactured for anybody else.

Another important development is the fact we are now incorporating Perma Fresh fibres within the floor covering which is exclusive within the British Floor Guardian range of sports hall and leisure products.

Perma fresh is a microband fibre which is anti bacterial and prevents fungi or mould growth this makes its use particularly suitable for Asthmatics and suitable for all customers to participate in exercise classes yoga, Pilates or any other activities such as first aid training where participants may be required to lay on the floor.

British Floor Guardian are able to supply purpose made storage/carry bags making it easy to move and store. We recommend and supply RugDoctor Pro and RugDoctor carpet cleaning & maintenance products.

We also sell CLASSMATE which is an acoustic and thermal wall insulation product, which also acts as a useful notice board.

This product has been very successful in Leisure Centres and Schools as it reduces reverberated and transmitted noise.

Areas of application: Sports halls run off areas, meeting rooms, corridors, hall ways, class room walls, libraries, computer rooms, lecture theatres, staff rooms, music rooms, etc.

PERFORMANCE

Static Electricity:	IBM/ICL	Pass - Suitable for use in computer rooms
Light Fastness:	BS1006:B02	6
